

Subject: Being Eco-Friendly

1. Match the following words with the appropriate definitions

- eco-nut • global warming • natural resources • deforestation • battery farming • biodiversity
- dumping ground • carbon footprint • heat wave • endangered species • carbon dioxide • greenhouse effect

- the gradual increase in the Earth's temperature
- gas produced, among other things, as a waste product of breathing
- the carbon dioxide produced by each individual, creature or building
- someone extremely passionate about the environment
- cutting down trees in a particular area
- the plants and animals living in a particular region
- a period of high temperatures and hot weather
- a place where litter and waste are taken and collected
- animals/plants that may become extinct
- resources such as coal or wood
- heat not escaping the Earth's atmosphere which causes a rise in the Earth's temperature
- an informal word used to describe people who want to protect the environment, especially trees and forests
- farms with chickens kept in small boxes

2. Work in pairs. Play noughts and crosses. After defining a term, the player can put his or her symbol (either a cross or a circle) in the selected box. The winner is the person who gets three of their symbols vertically, horizontally or diagonally.

global warming	deforestation	carbon dioxide
endangered species	dumping ground	natural resources
biodiversity	battery farming	carbon footprint
global warming	deforestation	carbon dioxide
endangered species	heat wave	eco-nut
greenhouse effect	battery farming	carbon footprint
